This reference list was created as part of the development of a series of Country Snapshots focusing on HIV, MSM and Transgender people in the Asia-Pacific Region. These Snapshots are available at www.apcom.org/snapshots2010.html.

As new data is incorporated into the Snapshots, not all of these documents will be referenced in the Snapshots, but will remain on this list to allow it to act as a useful source of information in its own right.
